

## DIANNE C. BOHOLST

09127482700 | Boholstdianne1@gmail.com | [gittydia.vercel.app](https://gittydia.vercel.app) | Angono, Rizal, Philippines |  
Expected Graduation: May 2027

---

### EDUCATION & PROFESSIONAL DEVELOPMENT

**Rizal Technological University** | BS in Information Technology | 2023 – May 2027

- **Academic Excellence:** Cumulative GWA: 1.50 | Academic Achiever (2023 – 2026)
  - **Leadership:** Co-Head, AWS Learning Club Alpha ML & AI Skill Builder (2025 – Present)
  - **Certifications:** Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate (Feb 2025)
    - Data Science & Machine Learning (Udemy) | Crash Course on Python (Coursera)
  - **Hackathons & Recognition:** 3rd Place – AWS Innovation Camp 2025
    - **Semi-Finalist** – BPI Datawave 2025 & Agentic AI Hackathon
  - **Community:** Tech Volunteer – Workflow PH (2026 – Present)
- 

### TECHNICAL SKILLS

Python, JavaScript, TypeScript, FastAPI, Node.js, React.js, Next.js, Odoo ERP, XML, HTML, CSS, PostgreSQL, pgAdmin, MySQL, MongoDB, PGlite, Docker, Git, GitHub, OneDev, JSON-RPC, IndexedDB, Figma, DeepSeek, OpenAI, Scikit-learn, WebAssembly (Wasm).

**Agile & Methodology:** Sprint Planning, Daily Standups, Post-mortems, Retrospectives, Arrange-Act-Assert Testing, Smoke Testing, ETL Operations, Technical Documentation.

---

### PROFESSIONAL EXPERIENCE

**Golden Suntec Solutions** | Software Engineer & QA Intern | Feb 2026 – April 2026

**Tech:** Odoo, Python, PostgreSQL, Docker, XML, Onedev, JavaScript, WebAssembly (Wasm).

- **ERP Implementation & Support:** Supported Infra and Commercial Tech teams in ERP implementation, testing, automation initiatives, and demo environment preparation to increase team effectiveness.
  - **Odoo Data Flow:** Collaborated with the team to implement a data migration pipeline; mapped schemas and performed ETL (Extract, Transform, Load) operations to clean and validate datasets.
  - **Distributed Architecture:** Engineered a distributed sync architecture for Orca-Trece, a custom Odoo project built to ensure robust, offline-first data functionality.
  - **QA & Agile:** Performed 112 QA tasks following Arrange, Act, Assert (AAA) principles. Participated in Agile ceremonies including daily standups, retrospectives, and post-mortems.
  - **Telegram Integration:** Deployed a custom Telegram bot interfacing with Odoo; engineered high-performance logic by bundling core modules into WebAssembly (Wasm) to ensure efficient, secure remote data management and real-time updates.
- 

### PROJECTS

**Clarify** | Dec 2025 | **Tech:** Next.js, TypeScript, Agora, OpenAI, AWS

- Built a real-time conversational AI that captures meeting decisions and automatically delegates tasks to eliminate manual follow-up effort.

**AMBAG** | Aug 2025 | **Tech:** Python, ReactJS, DeepSeek, MongoDB, Docker, Render

- Engineered the backend architecture and middleware for a group-savings platform, integrating seamless API communication to automate payment tracking.

**BukidMate** | Sep 2025 | **Tech:** Python, AI Analysis, Figma

- Architected backend logic for an AI partner analyzing weather and market supply/demand to predict optimal crop-selling timelines for farmers.

**GABAY** | Feb 2025 | **Tech:** Python, FastAPI, React.js, Vite

- Developed business logic and integrated APIs for a decision-simulation tool providing entrepreneurs with data-driven market trend predictions.

**RuleBox-F1** | July 2025 – Present | **Tech:** Node.js, React.js, MongoDB, JWT

- Built a full-stack RAG application featuring JWT authentication for natural language search over FIA Formula 1 regulations.

**PDFhero** | Jan 2025 – March 2025 | **Tech:** Python, FastAPI, DeepSeek, JavaScript

- Created an AI study assistant that processes PDFs to generate summaries, concise notes, and automated practice test questions.
